IDEATION PHASE
EMPATHIZE & DISCOVER

Date	31 January 2025
Team ID	LTVIP2026TMIDS36523
Project Name	EMPOWERING INDIA: Analysing the evaluation of union budget allocation
Maximum Marks	2 Marks

EMPATHY MAP:

PURPOSE:

The purpose of an empathy map in Union Budget allocation for sustainable growth is to understand the needs, problems, and expectations of different stakeholders like farmers, taxpayers, and small businesses. It helps policymakers see what citizens think, feel, say, and do. This ensures that budget decisions are people-centered rather than only data-driven. It supports inclusive and fair financial planning. Overall, it helps design policies that truly address real-life challenges.

USES:

An empathy map is used to identify key issues faced by different sections of society before allocating funds. It helps in prioritizing sectors like agriculture, healthcare, and education based on citizens' concerns. It improves decision-making by focusing on actual ground-level problems. It also supports better policy evaluation after implementation. In the long run, it str sustainable and balanced economic development.

.

Empathy Map

Empowering India: Analysing the Evolution of **Union Budget** Allocations for Sustainable Growth

Policy makers / Researchers /
Economists- Students merted in Budget analysis

What does he/she THINK & FEEL?

- Concerned about India's economic growth and sustainability
- Curious about how budget allocations impact sectors like health, education, infrastructure
- Wants transparency in government spending
- Feels confused due o complex budget data
- Hopes for balanced and inclusive development

What does he/she SEE?

- Annual Union Budget announcements
- News debates and media analysis
- Rising inflation, unemployment, development issues
- Sector-wise allocation comparisisons
- Government schemes and reforms

What does he HEAR?

- Finance Minister's budget speech
- Opinions from economists and financial experts
- Political discussions and public reactions
- Social media debates on taxes and subsidies
- Discussions about GDP growth and fiscal deficit

What does he /she SAY AND DO?

- Discusses budget highlights with peers
- Shares opinions on tax polcies and welfare schemes
- Analyzes data, reports, and past budget trends
- Participates in academic or policy discussions

Looks for sector growth insights

PAINS (Challenges)

- Complex and lengthy budget documents
- Difficulty in understanding allocation trends
- Lack of simplified visual data
- Uncertainty about long-term impact
- Misinformation from media sources

GAINS (Needs & Goals)

- Clear visualization of budget trends
- Easy comparison of sector-wise allocations
- Insight into sustainable growth patterns
- Data-driven conclusions
- Better understanding of government priorities
